Submitted Sep 28 at 8:26pm

This attempt took 19 minutes.

Correct!

Question 1

2 / 2 pts

Select the correct statement for a kanban method.

☒ It assumes a continuous flow of issues.

☐ It does not work well if the team is developing a product.

☐ It assume work will be completed in 2-4 week iterations.

Correct!

Question 2

2 / 2 pts

Given the assumption that two adjacent columns in a kanban board are present (first column and second column), which of the following statement is correct?

☐ The performer of column1 can pull an issue to column2.

☒ The performer of column2 can pull an issue to column2.

☐ An issue can not be pulled into column2.

Correct!

Question 3

2 / 2 pts

Select the correct statement for kanban boards.

☐ A team member should not start development on issues in the "in progress" column.

☐ A team member should not start development on issues in the "selected for development" column.

☒ A team member should not start development on issues in the "backlog"column.

Question 4

2 / 2 pts

Which of the following is not determined using a cumulative flow diagram report?

Correct!

- ☐ Whether the team is keeping up with the backlog.
- ☒ Problems with a single issue.
- ☐ Bottlenecks in the process.

Question 5

2 / 2 pts

Correct!

On what grounds that work in progress (WIP) limits column that the MINIMUM value is set.

- ☐ The team tends to avoid doing the work in the column.
- ☒ The team runs out of things to work on.
- ☐ The team is trying to do too many things at once.
