### Question 1                                                                    0 / 2 pts

Select a correct statement on WIP limits.

- ☑ They help the team continuously improve.

- ☑ It should be implemented in all development projects.

- ☐ They slow down the process flow.

- ☑ They should be set for every status.

---

### Question 2                                                                    2 / 2 pts

Select the correct statement about agile approaches to product development.

- ○ They are interactive but not incremental.

- ○ They are incremental but not iterative.

- ⦿ They are iterative and incremental.

- ○ They are not iterative and not incremental.

---

### Question 3                                                                    2 / 2 pts

When a member of the development team is ready to work on an issue in the standard Jira workflow (basic and simple template), which of the following statement(s) is/are true?

- ☐ Mark it as done.

- ☑ The issue at the top of the "selected for development" column is pulled to the "in progress" column.

☐ Any issue from the backlog is pulled and change its status as "work in progress".

☐ A planning meeting should be called to get the desired output.

## Question 4                                                              2 / 2 pts

Select the correct statement for the kanban method.

○ Forces to release a product when transferring from one column to another.

○ You must create new team roles to implement Kanban.

○ It is not related to agile.

◉ A key principle is to limit work in progress.

## Question 5                                                              2 / 2 pts

Select the correct statement.

○ The scientific method does not apply to teams.

◉ The scientific method is similar to the "plan, do check, act" method of improving business process.

○ The scientific method usually does not involved iterations.

## Question 6                                                              2 / 2 pts

Select the correct statement for the hierarchy introduced in Jira.

◉ An application contains projects, which contains issues.

○ An issue contains projects.

○ An application can contain only one project.

## Question 7                                                              2 / 2 pts

New Jollibee improves its business process in its order that provides two choices - you can buy a prepared meal in the countertop display or you can order a prepared meal at the counter and have it prepared for you. From the perspective of preparing the meal, which uses a pull system?

☐ The countertop display only.

☐ Neither the countertop display or the counter.

☑ The counter only.

☐ Both the countertop display and the counter.

---

**Question 8**                                                    **2 / 2 pts**

Select the correct statement for Jira projects.

◉ A project template can be selected when creating a project.

○ Project templates are also called fields.

○ Issues will automatically be created when creating a project.

---

**Question 9**                                                    **2 / 2 pts**

A column is always associated with _____. (Typically happens when adding a new column to the kanban board.)

○ A workflow

○ A unique identifier/key

○ An issue

◉ A status

---

**Question 10**                                                   **2 / 2 pts**

Select the correct statement.

☐ A cumulative flow diagram should ideally trend down over time.

☐
The flow should display the timeline of the issue being address in respect to the push and pull requests.

☑ A cumulative flow diagram shows the number of issues in each status over time.

☐ Cycle is the time from the issue creation to issue completion.

---

**Question 11**                                                   **2 / 2 pts**

Which statement is true about kanban backlogs?

☑ It can be change at any time.

☐ It should not be changed.

☐ It should only be changed during certain time windows.

**Question 12**                                                      2 / 2 pts

Select the correct statement.

&#9675; Waterfall projects usually have shorter iterations than agile projects.

&#9673; In agile project management, planning is distributed throughout the life of the project.

&#9675; The feature batch size in waterfall project management is usually very small.

**Question 13**                                                      2 / 2 pts

Select the correct statement for Jira settings.

&#9675; A change to a setting always applies only to a specific project.

&#9675; A change to a setting always applies to all projects.

&#9673; The scope of what a setting applies to depends on which level of the Jira hierarchy that you are in.

**Question 14**                                                      2 / 2 pts

What is the reason for having multiple columns in agile boards?

&#9675; One column for each work item.

&#9673; ne column for each step that a work item goes though.

&#9675; One column for each team member.

**Question 15**                                                      2 / 2 pts

In the kanban board, what happens to the issue when moving from one column to the other?

&#9675; The issue's workflow chnages.

&#9675; A new issue is created. And removes' the old issue.

&#9673; The value of the issue's "status" field changes.
